## EDITORIAL

We are pleased to announce that a new corporation

### NUMISMATIC FINE ARTS, INC.

has been formed by the merger of the old Joel L. Malter & Co., Inc. and Constantinople Fine Arts, Inc. The staff remains the same—only the name has been changed. By merging our two companies into one large entity we are able to increase our purchasing power and to offer a greater selection to our clientele. Thus from November 1, 1974 Joel L. Malter & Co., Inc. and Constantinople Fine Arts, Inc. will cease to exist, and the new NUMISMATIC FINE ARTS, INC. will begin. Please address all correspondence, orders and checks to the new name. The office address will remain the same for the time being, and our mailing address is still:

Numismatic Fine Arts, Inc.  
P. O. Box 777  
Encino, California 91316

This issue of JNFA is a special three-in-one merger issue and contains over one million dollars in coins—something for everyone. It brings Volume 3 to a close, but Numismatic Fine Arts, Inc. will continue to publish JNFA on a quarterly basis, beginning Volume 4 in 1975.

Joel L. Malter, President

### A HOARD OF BYZANTINE DRACHMS

These Rhodian standard drachms were struck in Byzantium in Thrace before 350 B.C. The obverse bears the forepart of a cow standing left on a dolphin, possibly representing Io in cow form crossing the Bosphorus according to the suggestion of Svoronos (*N.C.* 1890, 332). The inscription  $\eta \tau$  demonstrates the old Corinthian form of B, which appears nowhere else on coinage. The reverse type is an ornate trident. BMC 22-24.

#### SOUTH ITALIAN HOARD

The hoard which produced the Tarentine staters listed above also contained a scattering of later fifth to fourth century staters from other Italian cities. Most prominent among these is Campanian Neapolis, but Thurium, Velia and Poseidonia are also represented. The types are familiar: *Neapolis* Head of nymph Parthenope(?) r./Nike crowning man-headed bull; *Poseidonia* Poseidon hurling trident r./Bull walking l.; *Thurium* Helmeted head of Athena r./Charging bull; *Velia* Helmeted head of Athena l./Lion devouring prey or attacking stag. Because a number of these popular and artistic coins occur in lower grades (VG-F) we are able to offer them to our readers at a bargain price. Finer specimens from our regular stock are priced \$300 to \$1000. These hoard pieces..... 150.00

## THE WORKS OF SIR W. M. FLINDERS PETRIE REPRINTED

SIR W. M. FLINDERS PETRIE (1853-1942) remains one of the greatest Egyptologists of all time. His astonishing career, which spanned over 70 years of active archaeology, laid the foundations of much of our knowledge of the civilization of ancient Egypt. His methods set a pattern for archaeological excavation in Egypt which is largely followed today. He combined enormous physical energy with the ability to select significant sites one after the other, to muster his finds systematically and to publish them accurately, rapidly and clearly. A basic library of his work is still of prime importance to those wishing to understand ancient Egypt, and it is the purpose of the present series to make his work available again.

Although many of Petrie's theories are no longer acceptable to modern scholarship, as is inevitable after so long a time, two classes of his work remain of lasting value. The first of these is his systematic collection of objects, which provides a corpus of material against which subsequent finds can be identified and dated. The second class of work comprises Petrie's publications of his pioneer excavations in Egypt. Particularly important among these are some of the early excavations carried out in the late nineteenth century. It has been decided, with the cooperation of the Petrie family and of the Department of Egyptology at University College London, where much of the material which forms one of the finest teaching collections is housed, to reprint these early excavation reports. They show Petrie at work on three very different sites, all of which are of fundamental importance to Egyptology. In the early days of the British School of Archaeology in Egypt their circulation was restricted: they have long been out of print.

The complete set of eleven volumes may be obtained postpaid for \$200.00, which represents a discount of more than 10% over the prices of the eleven volumes figured individually.

### CATALOGUES

1. **Amulets** (1914) 123 pages, 54 plates. \$20.00.
2. **Scarabs and Cylinders with Names** (1917) 150 pages, 73 plates. \$22.50. *Petrie catalogues only those scarabs with names. Over 240 different royal persons alone are included in the collection. As Petrie himself says, "These scarabs can be dated and stand in the same sort of relation to Egyptian history that coins do to Western history."*
3. **Buttons and Design Scarabs** (1925) 68 pages, 30 plates. \$15.00. *Especially rich in material of the First and Second Intermediate Periods; includes a supplement with scarabs, scaraboids, "button" and stamp seals with inscriptions other than proper names.*
4. **Shabtis** (1935) 64 pages, 30 plates. \$15.00.
5. **Glass Stamps and Weights with Ancient Weights and Measures** (1926) 2 volumes in 1, 169 pages, 70 plates. \$20.00. *The making of glass discs stamped by die is peculiar to Egypt in the early centuries of our era. They were used as tokens, hallmarks on cups, weights or cup measures. The Petrie Collection is especially strong in measure stamps and is basic to the study of ancient metrology.*
6. **Objects of Daily Use** (1927) 142 pages, 62 plates. \$20.00.
7. **Tools and Weapons** (1927) 156 pages, 79 plates. \$20.00.
8. **Prehistoric Egypt with Corpus of Prehistoric Pottery and Palettes** (1920 and 1921) 2 volumes in 1, 180 pages, 61 plates. \$25.00. *The fundamental corpus of material for the Naqada civilizations and the sole catalogue of perhaps the most representative collection of Predynastic material outside Egypt.*

### EXCAVATION REPORTS

9. **Tell el Amarna** (1894) 93 pages, 39 plates + 4 colored. \$22.50. *This site, so surrounded by subsequent controversy and glamor, can here be seen through the eyes of its first excavator. Petrie excavated the Great Palace, in which alone much of the detail of Amarna architecture survived, and hence this pioneer report is still of scientific importance.*
10. **Naqada and Ballas** (1896) 175 pages, 86 plates. \$20.00. *The first major investigation of the Predynastic Civilization of ancient Egypt, still of first class archaeological importance as the basic report on the site of Naqada, the most important center of the "Naqada" civilization of Upper Egypt.*
11. **Illahun, Kahun and Gurob** (1891) 98 pages, 33 plates. \$20.00. *The excavation of these towns revealed much of the civilization of Middle and New Kingdom Egypt. Kahun is significant because it is one of the few towns of the Middle Kingdom, as opposed to cemeteries, that have ever been excavated.*
